

Pin DIode MODS FOR MP MK V and FIELD

Author: Kirby, K7EC

It is not widely known that a Receiver Pin Diode and Overall Receiver Quieting MOD is available from Yaesu USA for the FT1000MP MK V and FT1000MP Field models.

Yaesu WILL charge you for performing the mod, but it REALLY fixes these receivers and is well worth what they charge!!

The noise in the receivers is dramatically lower and the signals are much clearer after they perform the MOD! Contact Yaesu at 714-827-7600 for cost etc. I am NOT affiliated with Yaesu, but I love their radios!! After you have them do their PIN mod on your radio, be sure to add the appropriate INRAD ROOFING FILTER to your radio, as it really works to clean up adjacent signal problems. You can call Inrad at 541-459-5623. I am not affiliated with Inrad, but their ROOFING FILTER MOD is EXCELLENT.

NOTE: Be sure to order the correct Roofing Filter if more than one type is available (SSB VS CW, as SSB is too wide to be copied through the narrow CW Roofing Filter!) See <http://www.qth.com/inrad/roofing-filters.pdf> for more info.

73 es Gud DX,

Kirby, K7EC
